

# MUB 102 : MUSIC BUSINESS AND TECHNOLOGY PRACTICUM

This practicum provides unique opportunities for relating musical processes (such as composition and performance) to music business processes (such as budget design and analysis, accounting procedures and legal considerations) and/or music technology activities (such as recording, sound synthesis and sound reinforcement) in order to increase breadth of competence. Each student is required to enroll in and complete two terms of the practicum while enrolled in the Music Business and Technology Certificate Program. The ultimate goal of the practicum is to enable the student to synthesize the disciplines of music, music business and/or music technology through specific projects designed by a certificate director. This course is offered for one elective credit and may be scheduled during any term, to be determined by its content and format. Non-certificate program students may enroll for elective credit.

1.000

Admission to the Music Business and Technology Certificate Program or permission of the instructor.
