

## ATM 214 : LABORATORY FOR MEANING AND VALUE IN ART

The goal of the laboratory experience is to enable the student to synthesize the disciplines of art, psychology and/or mathematics through specific projects designed by the students themselves, a faculty mentor and/or the certificate program director. This experiential course may be scheduled during any term with specific activities to be determined by its content and format. Each student is required to enroll in and complete two terms of the lab while enrolled in the Art and Cognition Certificate Program. Other students may enroll for elective credit. A lab fee is included.

3.000

Admission to the Art and Cognition Certificate Program or permission of the instructor.
