

CHM 190 : GENERAL CHEMISTRY

This is the first course in an introductory four semester sequence intended for chemistry and biochemistry majors, minors and pre health students. The course lays the foundation for further coursework in chemistry. Topics include atomic and molecular structure, stoichiometry, various chemical reactions, chemical bonding models, and an introduction to chemical thermodynamics and equilibrium. Lecture and laboratory format. Lab Fee. Offered every Fall Term

4.000

High school Algebra or equivalent. Required for major and minor.
