

CSC 126 : NAVIGATING THE REVOLUTION: AN INTRODUCTION TO DIGITAL STUDIES

Gives students a broad introduction to uses of computing across the curriculum, and to some of the ways in which computing is transforming both the curriculum and society at large. Topics of particular interest will include the ways in which computers represent data; the ways in which computers change our methods of communication; and the ways in which computing technology raises societal issues not previously seen. CSC 125 and CSC 126 may not both be taken for credit. Quantitative GEP requirement. 3.000

Computer Science

Minor credit.
