

EDU 387 : LABORATORY SCIENCE MANAGEMENT- READING

This course gives the prospective secondary science teacher an opportunity to develop the laboratory skills necessary to manage a laboratory and to design experiments, laboratory and field activities, and demonstrations. In addition, the student must satisfactorily complete required reading and assignments. This required course for prospective secondary science majors is available (with the approval of instructor) when there is a demand from juniors or seniors.

3.000

Upper-class status and approval of instructor.
