

ENGINEERING FUNDAMENTALS OF ENGINEERING ANALYSIS

Engineers are creative problem solvers. They apply various aspects of math and the physical sciences to resolve technical issues, taking into account a wide range of specifications. They are frequently asked to lead or be part of multidisciplinary teams where good communication skills are essential. The objectives of this course are to: introduce students to engineering analysis and design techniques; introduce the teamwork approach to engineering, and to let students work on engineering type problems in a team setting.
